

MZINGA INCUBATION PROGRAM HOSTS FIRST 2025 QUARTERLY MEETING

The Mzinga Incubation Program, an initiative by the Malawi Stock Exchange (MSE) to nurture and prepare high-potential enterprises for capital market readiness, held its First Quarterly Meeting of 2025 on 4 April 2025 at Protea Ryalls Hotel, Blantyre.

The meeting brought together key stakeholders, including incubation participants, corporate advisors and capital market professionals, to reflect on progress, share insights and strengthen collaboration within the program.

The session opened with remarks by Mr. John Robson Kamanga, CEO of the Malawi Stock Exchange, who reaffirmed MSE's commitment to supporting early-stage enterprises in building sustainable, growth-oriented businesses.

Participants and corporate advisors presented progress reports, highlighting the milestones achieved since the program's launch and outlining key areas of focus for the coming months. This was followed by an insightful presentation on **"The Role of Transaction Advisors During the Listing Process"** delivered by Mr. Kenneth Mmadi, General Manager of Continental Capital Limited. His session emphasized the critical advisory support required for businesses transitioning toward public listing.

Another key highlight was a demonstration of the Automated Trading System (ATS) by Mr. Douglas Nyirenda, Senior Operations and Compliance Officer at MSE. The demo provided participants with practical insights into how trades are executed and monitored on the platform, fostering greater understanding of post-listing processes.

The meeting concluded with a vibrant discussion session, allowing for open engagement between incubates, advisors and MSE professionals. In her closing remarks, Mrs. Kelline Kondowe, Chief Operating Officer of MSE, encouraged participants to remain committed to the program, emphasizing its long-term vision of developing viable enterprises capable of accessing capital through the stock market.

The quarterly meeting reaffirmed MSE's strategic role in building a pipeline of future listed companies, driving economic development and promoting inclusive growth through capital market access.
